Access to Health Education through Active Learning

1. To access the Research Education in Dentistry cases go to:

http://health.dent.umich.edu

For best viewing, use Internet Explorer 7 or higher, Firefox 2 or higher, Safari 2.0 or higher or Opera 9.0 or higher.

2. Click on Evidence Based Cases
3. To **Register** click on the link `<Register for a new account>`. Fill in the required fields to create a login name and password. For more detailed instructions see the *How to Register* guide.

Once you have registered, login using your new user name and password.

4. When you are logged in select the case you have been assigned.
5. When you enter a simulation you will see a Case Overview page. It contains important background information about the case, so be sure you read it carefully. There are multiple activities in each simulation that must be completed in the order they are presented. To start, click on Activity 1.
6. At the top of the page is a row of navigation tabs that will help you complete the assignments in the simulation. Some of the tabs may have drop down menus. On the right hand side is a box listing all the activities in the simulation. You can use it to help you move back and forth between activities.
7. Each activity contains milestones or assignments to complete. Check the box next to a milestone when you’ve finished it. Be sure to finish all the milestones in the order they are presented, because the program will not allow you to move on to the next activity until each one is complete.

Sim Instructions
8. In some activities you will be instructed to use the Discussion tab to answer specific questions. Click the box below a question to reveal a pop up where you can write your answers. Be sure to click the Save button before you close the pop up or move to another page. This will save your work as a PDF file and allow you to come back and work on it later. If you don’t click the Save button, you will lose your work.
9. All PDFs you create will appear under the PDF tab. It’s a good idea to download the PDF files to your computer’s desktop so you can use them again later.

10. If you need more information while you’re working on the case, look for the blue What Is This buttons. Click on these to find definitions, examples of assignments, or additional information that will help you better understand the activities in the simulation.
